

## Index

1-forms 96

Aberration  
– of light 87  
addition of velocities  
– relativistic 39  
atlas  
– complete 91

canonical projection 110  
causal 47, 61  
causal cone 58, 62  
– backward 62  
– forward 62  
– future 62  
– past 62  
causal future 63  
causal past 63  
causal relation 62  
causality 62  
chronological future 62, 63  
chronological past 63  
chronological relation 62  
chronology 62  
 $C^k$ -atlas 91  
clock of  $\gamma$  71  
clock on  $\gamma[I]$  71  
coordinates  
– non-Minkowskian 52  
cosmological constant 4  
cotangent space 96  
covariant derivatives 59  
covector field 114  
covectors 96

Decomposition  
– nonorthochronous Lorentz matrices 35  
decomposition  
– nonuniqueness 36  
– of products 39  
decomposition theorem  
– interpretation of the 34  
– Lorentz matrices 29  
difference angle  
– of the aberration 89  
direct sum 104

energy momentum tensor 4  
*EPS* axiomatic 1  
Euler decomposition 42  
Euler Theorem 41

finite selection functions  
– over  $Y$  108  
first clock effect 82  
free vector space  
– over the set  $Y$  109  
future-pointing 56, 59, 62

gravitational constant  
– Einsteinian 4

inertial system 70  
initial observer 70  
inner product 99  
– definite 99  
– indefinite 99  
instant observer 70

length contraction 83  
light ray 69  
light signal 69  
light world line 69  
lightcurve 68  
lightlike 47, 61  
lightlike signal 69  
linear forms 96  
local Minkowski coordinates 6

Lorentz 1  
Lorentz group 10  
Lorentz manifold 3  
Lorentz matrices  
– orthogonal 21  
– rotational 21  
Lorentz matrix 6  
– antichronous 15  
– orthochronous 15  
– proper 15  
– special 18  
Lorentz transformation 6  
– homogeneous 10  
– orthochronous 24  
– proper 24

122 — Index

– special 24  
Lorentz vector space 3, 99  
Lorentzian manifold 55, 115

manifold 1  
–  $n$ -dimensional  $C^k$  91  
– differentiable 91  
metric 114  
metrical tensor 114  
Minkowski basis 99  
Minkowski chart 5, 6  
Minkowski coordinate 5, 6  
Minkowski observer 70  
Minkowski reference system 70  
Minkowski space 3  
Minkowski spacetime 3  
musical operators 102

negatively oriented 64  
Newtonian velocity 75  
nondegenerate 99

observers 70  
*OC* condition 27  
orientation 60  
– of the vector space  $M^5$  64  
oriented 60  
– negatively 60  
– positively 60  
orthogonal complement 105

parallelism 59  
past-pointing 56, 59, 62  
physical equivalence map 101  
physically equivalent 101  
Poincaré group 11  
positively oriented 64  
proper time 71  
proper time clock 71

quotient space 110

radar chart 79  
radar coordinates 79  
reference system 70  
Ricci curvature scalar 4

Ricci tensor 4  
Riemannian  
– manifold 114

scalar 114  
*Sch*<sup>2</sup> theory 1  
semi-Riemannian 114  
signal  
– material 66  
space  
– of an observer 74  
space-time theories 1  
spacelike 47, 61  
standard clock of  $\gamma$  71  
structure  
– differentiable 91

tangent space  
– at  $p \in M$  95  
– of  $p$  95  
tangent vector 92  
tangent vectors  
– spacelike 49  
– timelike 47  
tensor field  
–  $C^l$  113  
–  $j \leq k$  113  
time  
– of an observer 74  
time dilation 82  
time on  $\gamma[I]$  71  
time orientability 55  
time orientable 55  
time orientation 55  
– on  $\mathcal{N}^5$  56  
time parameter of  $\gamma$  71  
timelike 47, 61  
twin paradox 82

universal clock 73

vector field 114  
– parallel 59

world-curve 66  
worldline 66
