

Index

A
Abelian, 246
Affine geometry, 153
Affine plane, 327, 357
Antisymmetric, 217
Arc, 357
Archimedes, 35
Association scheme, 230, 357
Automorphism, 357

B
Baer subplane, 176, 357
Balanced incomplete block design, 182
Bayes' Theorem, 244
Bijective, 2
Binomial coefficient, 357
Binomial theorem, 240
Bipartite graph, 125, 358
Biplane, 188, 327, 358
Block, 181
Blocking set, 176, 358
Boolean algebra, 225
Bose-Mesner algebra, 231

C
Cardinality, 2, 4
Catalan number, 358
Chromatic number, 358
Chromatic polynomial, 358
Code, 265, 317, 358
Combination, 5
Combinatorics, vii
Complete graph, 124, 358
Connected graph, 358

Cross product, 84
Cubic number, 358
Cycle graph, 124, 358

D
Degree, 358
Design, 181, 322, 358
Difference set, 358
Directed graph, 358
Discrete graph, 124, 358
Drawing strategy, 322

E
Equivalence class, 36
Equivalence relation, 36
Erdős, 121
Euclidean algorithm, 36, 37
Euclidean geometry, 153
Euler, 35, 117
Euler cycle, 119
Euler's generalization of Fermat's Little Theorem, 43
Euler tour, 119, 359
Euler ϕ function, 42, 311

F
Factorial, 4
Fermat's Little Theorem, 43
Fibonacci, 31
Fibonacci sequence, 31, 359
Field, 359
Field homomorphism, 52
Field isomorphism, 52

Finite field, 52, 53
Finite set, 1
Function, 1

G
Games, 321
Gauss, 35
Generalized Hadamard matrix, 212, 359
Generalized multiplicative counting principle, 3
Generalized Pigeonhole Principle, 15
Goppa code, 318
Graph, 359
Graph coloring, 130, 358
Greatest lower bound, 221
Group, 234, 245, 359

H
Hadamard design, 209, 328, 359
Hadamard matrix, 203, 211, 359
Hall plane, 180
Hamilton cycle, 120, 359
Hamilton tour, 120, 359
Hamming code, 275, 277, 282, 318
Hamming distance, 231, 265
Hamming scheme, 232
Hasse diagram, 217, 224
Hypercube, 359
Hyperoval, 279, 359
Hyperplane, 153, 359

I
Independent, 240
Injective, 2
Inverse function, 2
Isomorphic, 53
Isomorphic graphs, 127

J
Johnson scheme, 235

K
Klein-4 group, 247
Königsberg bridge problem, 117
k-partite graph, 126, 359
Kronecker product, 205

L
LaGrange's Theorem, 249, 273
Latin hypercube, 214
Latin square, 246, 257, 359
Latin square graph, 126
Latin subsquare, 359

Lattice, 221, 359, 360
Least upper bound, 221
Liber Abaci, 31
Linear graph, 124, 360
Loop, 258
Lucas numbers, 33

M
Magic square, 83, 360
Main class, 91, 360
Maximal element, 220
McEliece cryptographic system, 317
MDS code, 360
Minimal element, 220
Minimum weight, 266
Monty Hall problem, 11, 242
Morra, 11
Multigraph, 118, 360
Multinomial coefficient, 360
Multiplicative counting principle, 3
Mutually exclusive, 239
Mutually Orthogonal Latin Squares (MOLS), 360

N
Near field, 178, 360
Net, 182, 329, 361
Niels Henrik Abel, 246

O
Oval, 361

P
Parallel line, 156, 361
Parity check matrix, 275, 361
Partial Latin square, 361
Partially ordered set, 216, 217, 361
Pascal's triangle, 6, 9
Payley construction, 206
Perfect code, 361
Permutation, 5, 16, 361
Permutation matrix, 317, 319
Pigeonhole principle, 14
Planar graph, 361
Primitive root, 312, 315, 361
Probability, 237, 361
Projective geometry, 158, 191, 280
Projective plane, 182, 275, 326, 361

Q
Quasigroup, 257, 361
Quotient graph, 127

R

Reflexive, [35](#), [217](#)
Regular graph, [126](#), [361](#)
Repetition code, [266](#)
Residual design, [362](#)
Resolvable, [187](#)
Resolvable design, [187](#)
RSA, [313](#)

S

Sample space, [237](#)
Schröder-Bernstein Theorem, [3](#)
Self-dual, [270](#)
Self-dual code, [362](#)
Self-orthogonal, [270](#)
Self-orthogonal code, [362](#)
Set, [1](#), [157](#)
Shor's algorithm, [315](#)
Simple graph, [123](#)
Singer cycle, [362](#)
Singleton bound, [283](#)
Skew lines, [156](#), [362](#)
Sphere packing bound, [362](#)
Square number, [362](#)
Steiner triple system, [330](#), [362](#)
Stirling number, [69](#), [70](#), [362](#)
Subgroup, [245](#)
Subset, [1](#)
Surjective, [2](#)

Symmetric, [35](#)

Symmetric design, [190](#), [328](#), [362](#)
Symmetric group, [246](#)
Syndrome, [362](#)

T

Tartaglia's triangle, [6](#)
Ternary ring, [177](#)
Tic-Tac-Toe, [322](#)
Tour, [119](#)
Towers of Hanoi, [72](#)
Transitive, [35](#), [217](#)
Translation line, [177](#)
Translation plane, [177](#)
Transversal, [362](#)
Transversal design, [362](#)
Triangular number, [362](#)
Tripartite, [126](#)

U

Unit, [362](#)

W

Weight function, [324](#)
Wheel graph, [124](#), [131](#), [362](#)
Winning strategy, [322](#)

Z

Zero divisor, [362](#)
